Technical Skills

Languages : Typescript, Javascript, Golang, C, C++, Python, SQL

Library and Framwork : NestJs, React, ExpressJs, JestJs, Loopback(Basic), Angular (Basic)

Database : Oracle SQL, PostgresSQL, MongoDB, Redis (Caching), S3

Tool : Git, Git Lab, Azure Service, Docker, Postman, DBeaver, VSCode, AWS Cloudwatch And Other Service

Other : Clean Architecture Design, SonarQ, Linter, GRPC, RESTAPI

Key Achievements

- Proven expertise in developing complex back-office systems for procurement contract management.
- Selected as Lead for Special Projects for two consecutive years
- Adhered to development standards and actively proposed new best practices
- Contributed to requirement analysis

Experience

Developer
AXONS (CPF IT CENTER CO., LTD.)
2023 - present

- Continued the development of the ingredient procurement system initiated during the internship, expanding its features and stability for production use.
- Developed a packaging contract and billing system, managing the complete lifecycle including customs clearance procedures.
- Developed a transportation management system for both Sea and Air freight, covering all required shipping contracts.
- Selected as Lead for Special Projects (Internal Hackathon) for two consecutive years, responsible for business planning, technical strategy, and executive-level pitching.
- Implemented automated document generation using JsPDF to create professional contracts and business reports.
- Adhered to development standards and actively proposed new best practices to ensure long-term maintainability, including Unit Testing, SonarQube integration, Linters, and standardized project structures.
- Presented product demonstrations to end-users and executives at the end of each sprint to showcase progress and new features.
- Conducted manual testing and meticulously documented sprint deliverables to ensure system reliability.
- Contributed to requirement analysis, proposing solutions that balance Business needs, Technical feasibility, and UX/UI design.
- Led "DOJO" knowledge-sharing sessions, upskilling the team on new technologies and best practices.

Developer (Cooperative Education)
BKP (CPF IT CENTER CO., LTD.)
2022 - 2023

- Developed and maintained domestic ingredient procurement products using Angular and Golang, adhering to Clean Architecture principles.
- Refactored legacy code bases into a modern architecture, significantly enhancing code readability and system maintainability
- Engineered a product price summary system by integrating Batch Processing with a hybrid data approach, utilizing both Document Databases (NoSQL) and Relational Databases (RDBMS)
- Collaborated with users to analyze and automate complex legacy calculation formulas, successfully migrating workflows from Excel to a web-based solution.
- Designed and implemented a specialized procurement management system for the Vietnam market.
- Communicated regularly with team to provide updates and ensure technical alignment with development plans.

Education

Bachelor of Computer Engineering
Prince of Songkla University Hatyai 3.35
2019 - 2023

- Second class Honors
- Huawei ICT Competition 2021-2022 Cloud Track (Honorable reward)
- KPMG Cyber Security Challenge 2021
- Shopee Code League 2022
- Working on design department in Prince of Songkla Rotaract Club
- Teacher assistant of introduction to computer programming class in 2022, 2021 and 2020
- Teacher assistant of Data Science for Torism course

Ammart Panitchanukul Krabi
Science Math Technology and Environment program (SMTE) 2.75
2013 - 2018

- Participated in the second round of POSN in 2016 and 2017
- Face detection project using openCV C++
